THE EFFECTS OF NICOTINE ON MESENCHYMAL STEM CELL FUNCTION

Book Condition: New. Publisher/Verlag: Scholar's Press | Cigarette smoking is the leading cause of preventable death worldwide. Despite the numerous detrimental health effects associated with cigarette smoking, the general population continues to struggle with smoking cessation. Cigarette addiction is predominantly due to nicotine, an organic compound found in all tobacco products. Nicotine is readily absorbed within the body and rapidly stimulates reward regions in the brain making it difficult for smokers to quit smoking. Nicotine replacement therapies (i.e. lozenges, patches,...
