We must now return to the consideration of the equations for l_i among the elements of M , which define a system of collineations within G_s having the first group property; and we shall apply the results of Theorem 9 to these equations. Let the three sets of cogredient variables be respectively the elements of the three rows of the matrix M let B , etc. (ϕ_i) be a complete family of automorphic forms in the elements of the rows of M and let π_i be transformed by U . Since the matrix of U is the conjugate of the matrix of M , the coefficients of each of the transformed forms π_i will reproduce in the elements of the rows of M the original forms in the rows of M . Equating corresponding coefficients of the original and transformed forms we have a set of...
