GRIN Verlag Gmbh Sep 2014, 2014. Taschenbuch. Book Condition: Neu. 211x149x7 mm. This item is printed on demand - Print on Demand Neuware - Seminar paper from the year 2013 in the subject Business economics - Investment and Finance, grade: B-, University of Bedfordshire, course: MSc FINANCE & BUSINESS MANAGEMENT, language: English, abstract: The central focus of this research project is to guide the relatively medium sized car dealership company towards making decision on the appropriate security financing option so that it would permit the given company to expand its operation while minimises its cost and maximises its profitability. In general there are three types of security financing (Equity Securities, Debt Securities and Asset-Backed Securities). Security Financing is also considers being a good financing source which involves the issuance of securities either in the stock market or in the capital market. In general, the companies financial decision subject to the composition of its Capital Structure. The Capital Structure is made up of two factors: debt & equity. The trade-off theory was originated out of debate over the Modigliani Miller theorem. The term trade-off theories was been used by different authors to state different group or similar related theories. The static trade-off theory confirms that the firm has perfect capital structure which they gain by trading off cost from the benefits of the use of equity and debt. The dynamic trade-off theory relates to the role of profit, role of retained earnings and path dependence. The concept of agency theory is emphasised more on the approach of concentrating on the nature of relationship existing between the company s shareholders (Principal) and their managers (Agents). Pecking order theory stressed that the company should first prefer to use internally generated income for the purpose of raising as it would restrict the company to...
