Brand New Book ***** Print on Demand *****.Recently, some in Congress have become concerned about the possible vulnerability of U.S. coastal areas to tsunamis, and about the adequacy of early warning for coastal areas of the western Atlantic Ocean. Those concerns stem from the December 26, 2004, tsunami that devastated many coastal areas around the northern Indian Ocean, where few tsunami early warning systems currently operate. Caused by a strong underwater earthquake off the coast of Sumatra, Indonesia, the tsunami disaster is estimated to have claimed as many as 300,000 lives. Affected nations, assisted by others, are pursuing a multilateral effort through the UNESCO Intergovernmental Oceanographic Commission (IOC) to develop an international tsunami detection and warning network that would guard coastal populations in the greater region of the Indian Ocean. Those efforts would coincide with the United States effort to upgrade and expand its tsunami detection and warning network. Some developed countries bounding the Indian Ocean region already have operating tsunami warnings systems. However, in some areas of these and neighboring countries an emergency management infrastructure to receive tsunami warnings is lacking, which leaves local officials incapable of rapidly alerting the public to evacuate or to take other safety precautions. Many disaster management experts assert that .
